INTERNSHIP

Login ware Softech pvt.Ltd, August 2022 - September 2022

➢ **Face recognition system using Machine learning and IOT**
- I learnt basic c programming, basic python, machine   learning, and iot using raspberry Pi .
- Face biometrics involves training known images, classify them with known classes and then they are stored in the database.
- When a test image is given to the system it is classified and compared with stored database.

PROJECTS

➢ **AWS : Hosting a Static Website using Route53 and GoDaddy.**
➢ **Women safety device with GPS tracking and Emergency alerting, April 2023 - July 2023**
- Nowadays, the amount of violence against women has increased ,it has now become a major issue.
- Looking towards all these issues, we proposed a device which will be really very helpful to women,
- Send victim's location with GPS and GSM using Microprocessor,and using 10k pot to vary temperature we can send a location to close contact number.
- She can turn on buzzer so near by people can help her.
- Using ultrasonic sensor she can able to know who is coming behind Her.
- Mobile charging status will updating in travelling mode the output shown in lcd aswell as in ubidots through phones.
- In cab if it detects alcohol the motor will stop Immediately
